

STANDARD F**HAV IgM FIA**  **SD BIOSENSOR**

Hepatitis A infection is caused worldwide and typically transmitted by the consumption of contaminated food or water. STANDARD F HAV IgM FIA qualitatively analyzes hepatitis A virus IgM antibody in serum, plasma and whole blood using Fluorescent Immunoassay (FIA). With a simple test method, the test result can be obtained within 15 minutes with its high sensitivity and specificity.

**Specification**

Specimen type	Whole Blood, Serum, Plasma
Specimen volume	10 µl
Testing time	15 minutes
Storage condition	2 - 30°C / 36 - 86°F

TEST PERFORMANCE

Reference	Sensitivity	Specificity
CLIA	100% (98/98)	98.4% (189/192)

ORDERING INFORMATION

Category	Product	Pack Size
Hepatitis	STANDARD F HAV IgM FIA	25 Test

STANDARD F**Anti-HBs FIA**  **SD BIOSENSOR**

STANDARD F Anti-HBs FIA is a fluorescent immunoassay for the qualitative detection of antibodies directed against Hepatitis B surface antigen (HBsAg)

**Specification**

Specimen type	Whole Blood, Serum, Plasma
Specimen volume	100 µl
Testing time	15 minutes
Storage condition	2 - 30°C / 36 - 86°F
