

# STANDARD Q Legionella Ag

STANDARD Q Legionella Ag performs qualitative analysis by detecting Legionella pneumophila antigens in urine samples using immunochromatography. With a simple test method, Legionnaires' disease can be discriminated, and with its high sensitivity and specificity, the screening test result can be obtained within 15 minutes.

## GENERAL INFORMATION:

- Detection of Legionella pneumophila serogroup 1 antigen
- Objective result: test result can be read and interpreted by STANDARD F Analyzers

Specification	
Specimen	Urine
Test Time	15-30 minutes
Specimen Volume	100µl
Sensitivity	97.6% (41/42)
Specificity	100% (165/165)
Storage Temperature	2-40°C / 36-104°F

## TEST PROCEDURE

## INTERPRETATION

## PERFORMANCE CHARACTERISTIC

Reference Method	Sensitivity	Specificity
DFA (Direct Fluorescent-antibody testing)	98.2% (56/57)	99.26% (135/136)

## ORDERING INFORMATION

Category	Product	Pack Size
Respiratory Disease	STANDARD Q Legionella Ag Test (Q Type)	25 Test
	STANDARD Q Legionella Ag Control (QF Type)	Pos x 10 / Neg x 10
